Lightroom Services

overview

Editing images in Adobe Lightroom can often feel like such a task. Perhaps you're a wedding photographer and have a few thousand images to cull and edit. Or maybe you're a travel photographer who is busy exploring the world in all of its glory; no one wants to be worrying about editing whilst you're travelling!

This is where I come in. I'm here to help you. Let me lighten the pressure from the masses of images that you need to edit. With over five years of Lightroom experience, and having worked with some incredible award-winning photographers in varying fields, you'll be sure that your beloved images will be safe in my hands.

what's included?

- ✿ A video consultation to chat about turn-around times, deadlines and the style of your images.
- ✿ A fully culled (optional) and edited catalogue of images

file handling

All files needed for me to edit in Lightroom will be uploaded and imported in a shared and private folder online via Dropbox/GoogleDrive/OneDrive etc.

Please be reminded that depending on the catalogue size, syncing/downloading could take some time (relying on both our internet speeds!) so please have this in mind when we talk about turn-around times and deadlines.

If for any reason there is a problem with the files, I'll do my best to let you know as soon as possible so we can find a solution and move on as quickly as possible.

Please note that I delete any files that we share after a two month period

Bespoke Lightroom

Preset

overview

Every photographer needs a Lightroom preset, and sometimes buying a premade one just doesn't cut it. Maybe you want your colours to POP, or have just the right shade of blue, or for your images to be sharp and clear, or dreamy and whimsical. Let's create a preset that makes your photographs stand out from the rest.

rate

A bespoke Lightroom preset is £30 for a colour or black and white preset, and £50 for both colour and black and white. You will get a guide as to how best use and understand your preset, as we all know, the colour balance varies enormously depending on where and when you shoot! We can have a chat about what mood you are looking for, and all files will be delivered via Dropbox/Google Drive/One Drive.
